***If you do not have a previous version of the Dlite PC, go directly to step 3.**

1. In case you have an earlier version of Dlite PC installed and running, close the Dlite PC by clicking the **X** in the upper right corner.
2. Save a copy of the "Shows" folder that is in the Dlite folder if needed.
 - 2.1. If you have created customized/New Devices, Back them up and store them to a different location so you can use them with the new version.
 - 2.2. Double Click the "**Dlite PC_10.6R1.exe**" file.
 - 2.3. On the window shown, choose the **Remove** Option in order to remove the SW.
 - 2.4. When the process is done click **Finish** to close the wizard.
 - 2.5. Proceed to install the new software Installation.
3. Double click the "**Dlite PC_10.6R1.exe**" file to begin the installation.
4. When prompted, click **Next** in the Welcome window.
5. When prompted, click **Yes** in the **License Agreement** window.
6. When prompted, click **Next** in the **Information** window.
7. In the **Choose Destination Location** window you have the option to set the installation path. The default path is: "C:\Program Files\Compulite\Dlite PC". When done click **Next**.
8. When prompt, click **Next** in the **Select Program Folder** window.
9. On the **Firewall Warning** message, click OK to apply.
10. When prompted, click **Finish** in the Dlite PC Setup wizard window.
11. The Dlite PC is now installed.
12. Optional- move the backup files back to the Dlite PC folder.
13. Run the program from the Start Menu -> -> **Dlite PC**, or from the shortcut on the Desktop.

Note: On running the Dlite PC for the first time, you might get a firewall message if to Block or unblock the application. Choose to Unblock and continue to work.

Now you are ready to Experience the Dlite PC!
