

Rave Release Notes

Release Date:	August 27, 2007
Software version	2.3R3
Panel version	1.42
Hardware version	4.0
Operating system image (monitor)	2.2
Operating system image (no monitor)	1.2

New Feature

DMX Input

DMX input values are now displayed on the external monitor.

Improved Feature

VC transmission

The Rave transmits VCs only from the port which is used in the fixture patch.

Fixed bugs

1. Light flickered when using DMX Input.
2. When VC was enabled and a connection break occurred, Rave crashed after a 30 minute interval.
3. Chases did not load correctly when loading a show with more than 10 chases
4. Effect libraries were lost when loading very big shows (95% of the memory).
